

We are actually looking for a

Senior Consultant Supply Chain Management
with a focus on Forecasting/Inventory Management/S&OP

Xeleos Consulting: Who we are?

Xeleos Consulting is helping organizations to achieve sustainable benefits in their Supply Chain through specialized consulting services for the industry and the Health Care sector. We focus on helping organizations optimize their Supply Chain and align it to their business strategy. Making the right choices enables our clients to achieve their business objectives and improve significantly their operations.

We strongly believe that excellent solutions will be reached if they are based on solid Supply Chain concepts, if they create value for the company and if they are accepted and used throughout the whole organization.

We offer following services: Supply Chain Strategy, Supply Chain Optimisation, Distribution Logistics Excellence and Business Process Excellence. We work closely with our clients on all the Supply Chain issues: from improvement assessment through solution design to implementation. Process, organization, information systems and infrastructure are all tackled in our methodology.

Our approach is recognizable by our focus on getting measurable results, transferring our knowledge to our clients and coaching them to achieve future success. Working alongside our clients we create practical action plans that enable them to make their vision a reality.

Our strength lies in the abilities of our people: their breadth of experience, industry knowledge and progressive attitude.

We have a Contagious Passion for Supply Chain Excellence.

As Xeleos Consulting has built a very strong leadership in developing a roadmap to help organizations in optimizing inventories and forecasting we are looking for a Senior Consultant with a broad view on Supply Chain Management and with a good knowledge of Forecasting, Inventory Management and Sales & Operations Planning.

Function: What we are looking for?

You will **lead Supply Chain improvement projects** at the customer site from the analysis of the current situation through the design of the solution up to its implementation.

Responsibilities include the overall planning, organizing, directing, controlling and delivery of the projects prioritized in alignment with the client's expectations and business needs. You will understand the customer's needs and requirements and will be able to structure and translate them into Business Solutions. During the project you will also gradually build a preferred relationship of trust with several contacts within the customer organization through your competence and empathy for their situation.

You are able to effectively coach people, to manage and inspire a team and to manage resistance to change in order to reach the project targets.

Part of these projects is also giving support on information technology. In the area of information technology we have developed Optimact which is a Forecasting and Inventory Management Optimisation tool. Therefore part of the job will be supporting the implementation of Optimact as project manager and consultant. Your aim will be to build enough expertise in order to develop an own Optimact practice within Xeleos Consulting.

There is a large variety of projects, customers, industries and markets offering a thoroughly diversified scope.

Your Profile: What we expect

- You are passionate for Supply Chain Excellence.
- You have at least 5 years relevant experience in the industry and/or in consulting in the Supply Chain Management area including business process management skills
- You have an expertise in Forecasting, Inventory Management, Sales & Operations planning
- You have expertise in one of our main service domains: Supply Chain Strategy, Supply Chain Optimisation, Distribution Logistics Excellence and Business Process Excellence
- You have at least a bachelor degree. Having a CPIM or CSCP-degree is a plus.
- You have good analytical and problem solving skills, you can rely on organizational and people management skills and have project management experience
- You have a good understanding of supporting information technology (ERP, SCM Optimization Software)
- You are no-nonsense, open and direct in communication and willing to travel
- You are fluent in Dutch and English, and have a very good working knowledge of French
